PROFILE

I am a Computer Systems Engineer with experience in software development, process automation, and data analysis. I excel in both backend and frontend development, working with DevOps tools and low-code/no-code platforms, and I am known for my ability to solve problems and deliver efficient, high-quality solutions.

WORK EXPERIENCE

- **Global Professional Group S.A.**

May 2023- Currently

I led the development and quality assurance of four key processes for the Ventanilla Única de Inversión (VUI) project, using the AuraQuantic platform to optimize management and automation. I also designed and built microservices with SQL Server, contributing to the system's integration and functionality.

EDUCATION
